HARPREET

Backend Developer

+919877095889 • preettt074@gmail.com • Jalandhar Punjab

Summary

I am a Laravel Backend Developer with 2+ years of experience in building scalable web applications and optimizing system performance. Skilled in PHP, Laravel, WHMCS, and Express, with a good understanding of React and Next.js. Proven ability to enhance API performance, optimize databases, and implement secure authentication systems. Passionate about writing clean, efficient code and collaborating with cross-functional teams to deliver high-quality software solutions.

Education

DAV COLLEGE JALANDHAR

Bachelor of Computer Applications

Experience

Jalandhar

Full Stack Developer

Worked in a hosting and web development company, specializing in web hosting, domain management, and custom web solutions. Gained experience in Laravel, PHP, WHMCS, and frontend technologies while developing and maintaining scalable web applications, integrating third-party APIs, and optimizing server performance.

Skills

PHP · Laravel · WHMCS · HTML · CSS · JavaScript · jQuery · Express js · MySQL · Mongo db · React js · Next js

Projects

Number plate generator

UK

It allows users to customize and generate UK-standard vehicle registration plates with various design options.

- Customization Options (font styles, colors, backgrounds, and borders).
- **UK Legal Standards Compliance** (BS AU 145e).
- Image Rendering to generate a preview of the designed plate.
- Order & Payment System (required for physical plate orders).

IP BLACKLIST CHECKER

UK

IP Blacklist Checker which allows users to verify whether an IP address is blacklisted across various databases. It helps in identifying **spam, malicious, or blocked** IPs efficiently.

- User Input Validation to ensure correct IP format.
- Automated API Integration for checking multiple sources.
- Blacklist History & Logs for tracking previous queries.
- Admin Dashboard for managing logs and checking reports.

WHMCS custom modules

UK

Custom WHMCS modules to enhance functionality, automate processes, and integrate third-party services for web hosting businesses. These modules extend WHMCS capabilities, providing tailored solutions for billing, automation, and client management.
